

**Disclaimer:**

**While every precaution has been taken in the preparation of this material, OOHNA assumes no responsibility for errors or omissions.**

**The listing is intended only as a guide and may not address all needs or situations. Additional courses may be available in other provinces, or through other health and safety organizations.**

One very important focus of the Ontario Occupational Health Nurses Association (OOHNA), from its inception, has been the education of its members. That focus has never diminished. In recent years, with educational institutions experiencing economic difficulties, courses for Occupational Health Nurses have become less available. It was felt, therefore, that it was important to provide members with a reference guide of educational institutions that continue to offer occupational health and safety courses in Ontario.

The following is a list of subject areas that generally make up the content of an Occupational Health Nursing Certificate or Diploma or would contribute toward competency as an Occupational Health Nurse:

- |                                   |   |
|-----------------------------------|---|
| Adult Education                   | Audiometric testing                       |
| Clinical/Placement Component      | Epidemiology & Statistics                 |
| Ergonomics                        | First Aid/CPR                             |
| Health Education/Health Promotion | Health Risk Appraisal                     |
| Health and Safety Legislation     | Industrial Psychology                     |
| Interviewing and Counselling      | Nursing Process                           |
| Occ. Health Principles/Concepts   | Occupational Hygiene/Environmental Health |
| Physical Hazards                  | Principles of Management                  |
| Physical Assessment               | Report Writing                            |
| Pulmonary Function Testing        | Rehabilitation/Case Management            |
| Toxicology/Health Surveillance    | Vision Screening                          |

The following table lists **Ontario** Colleges and Universities that offer programs related to Occupational Health Nursing and Health & Safety. Programs and courses are subject to change without notice.

**Because changes occur quickly, please contact the institution directly for more information.**
