## COVID-19: Your Help Is Needed Now!

Dear Members,

As health care professionals, we may be asking ourselves what more can we do to support Ontarians during the COVID-19 crisis? We may even find ourselves with extra time on our hands given Premier Ford's decision to shut down all non essential services. OOHNA would like to help connect you with those looking for this assistance. We have been asked, by several critical organizations, to develop a roster of occupational health nurses (active or retired) who may be available to provide additional support beyond their current employer. *If you have already offered your support by completing this survey, thank you and please disregard.*

If you are interested in being included in this roster please [click here](#) to complete the survey. OOHNA will then provide respondents with contact details of any member/ organization who reaches out to us looking for this additional assistance. This roster will only be activated on an as needed basis and only during the COVID-19 pandemic period. You may remove yourself from this list anytime by emailing: [administration@oohna.on.ca](mailto:administration@oohna.on.ca)

Please feel free to forward this message to other occupational health nurses who may not be OOHNA members as we are more than happy to have them participate. OOHNA realizes that many of our members are already working beyond capacity but for those who find themselves with some extra time we strongly encourage you respond to this call for help. I know that I myself will be doing so by offering to work additional hours beyond my normal work day.

The OOHNA team is predominately working offsite but are always available via email if we can be of ANY support.

In the meantime remember to take care of yourselves and remain safe and healthy!

Drew Sousa RN, COHN (C)

Executive Director  
Ontario Occupational Health Nurses Association
