

## **COVID-19 OPERATIONAL PLAN FOR WORKPLACES**

To ensure workplaces have documented their risk assessment and risk mitigation measures consistent with Public Health guidance and the *Occupational Health* and *Safety Act* and regulations, all employers must develop a written COVID-19 Operational Plan.

You must comply with the following provisions of the Mandatory Order:

- Owners and managers of every workplace must take every reasonable step to ensure minimal interaction of people within two metres of each other, except in compliance with guidelines issued by WorkSafeNB and the Chief Medical Officer of Health.
- Owners and managers of every workplace must take every reasonable step required to prevent persons who exhibit symptoms of COVID-19 from entering the workplace, in accordance with advice issued by the Chief Medical Officer of Health or WorkSafeNB.
- Owners and managers of every workplace must take every reasonable step required to prevent persons from entering workplaces who have travelled outside New Brunswick in the previous 14 days.

You do not need to submit the operational plan to WorkSafeNB before reopening. Individual COVID-19 operational plans will not be reviewed or approved by WorkSafeNB or Public Health. However, plans will need to be produced during inspections or if a complaint is made and an investigation follows by one of the regulatory bodies.

The following template may serve as a starting point for your COVID-19 Operational Plan. It helps guide you through some of the key areas to consider when assessing the risk surrounding the safe opening and continued operations of your workplace. Additional guidance from an industry association may also be available to help you address industry- or workplace-specific needs. If you operate across various provinces, requirements specific to New Brunswick must be included in your plan.

Just as viruses can mutate, guidelines related to COVID-19 can change. As an employer, you're responsible for keeping up to date on current guidelines and to change your plans as required. Refer to New Brunswick Public Health and WorkSafeNB websites for updates that may affect your workplace.

This template is available in a Word format.

## EMBRACING THE NEW NORMAL AS WE SAFELY RETURN TO WORK

## **Effective Risk Mitigation – Infection and Prevention Controls**

The best prevention controls in a workplace are achieved by first focusing on physical distancing and taking every reasonable step to restructure physical settings to increase space between people. Once you have exhausted all reasonable options in this category, move to the next stage within the inverse pyramid and conduct the same exercise, and so on until you reach PPE as a final step, if required.

- Physical distancing: Restructure
   physical settings and responsibilities
   to adhere to the minimum 2 metre
   requirement (increase space between
   people or reduce the number of
   people within a space at a given time).
   In addition, wherever possible, give
   employees the option to work or access
   businesses and other settings from
   home.
- Engineering controls: Create physical barriers between people when physical distancing is not possible or increase ventilation.
  - Administrative controls: Redistribute responsibilities to reduce contact between people, using technology for communication.
  - PPE: Have employees wear medical PPE for health-care settings, when required, and non-medical cloth face coverings to protect others where necessary.

Action Items	Resources (Examples, Templates, Guidance Documents)	Details of Implementation (PPE Specifics, Frequency, Policy Name, Process, etc.)	How is it communicated? (Poster, Training, Verbal Notice)	Status (Done, In Progress, Not Started, N/A)
Public Health Requirements (applies to EVERY workplace)				
Risk Assessment	Risk Assessment Guideline Health Canada			
Complete a risk assessment to determine the engineering, administrative controls and/or PPE controls necessary to mitigate the risk of COVID-19 exposure.				
Determine whether you need isolation elements as part of the operational plan for your workplace. For requirements, see page 14 of the <u>Embracing the New Normal guide</u> .	Isolation for Out-of- Province Workers form			
Physical Distancing				
Implement a two-metre physical distance protocol.				
Consider both employees and visitors/customers.				
Arrange furniture to promote the two-metre rule.	Physical Distancing			
Provide visual cues (ensure two-metre markings on floor, directional movement for patrons, no-stopping areas in narrow hallways, etc.).				
Determine if installation of physical barriers such as partitions or Plexiglas is feasible.				
Establish a protocol to ensure people don't congregate in groups (stagger start and break times, virtual rather than in-person meetings, limit access to common areas, etc.).	WorkSafeNB FAQ			
Evaluate options to reduce staff onsite, such as having some staff work from home, changing shift times and, implementing flexible work hours.				
Evaluate the risk of employees coming closer than two metres in all parts of the facility. Stairwells, entry and exit points and narrow hallways can present a challenge. Consider implementing one-way traffic zones where possible (one stairwell for walking up, a different one for walking down).				
Hand and Respiratory Hygiene				
Promote frequent handwashing.				
Have handwash stations readily available and equipped with running hot/cold water and adequate soap and paper towel.	Handwashing Poster			
Have minimum 60% alcohol-based hand sanitizer readily available.	Hand Sanitizer Poster			
Communicate frequently about good respiratory hygiene/cough etiquette.	Protect yourself and others			
Evaluate the workplace for shared objects and common areas and increase frequency of cleaning of touched surfaces/objects (minimum twice daily).	Cleaning and Disinfection for COVID-19			

Action Items	Resources (Examples, Templates, Guidance Documents)	Details of Implementation (PPE Specifics, Frequency, Policy Name, Process, etc.)	How is it communicated? (Poster, Training, Verbal Notice)	Status (Done, In Progress, Not Started, N/A)
Public Health Requirements (applies to EVERY workplace)				
Screening and Monitoring				
Determine if your workplace must implement a passive or active screening process. For more information on active screening, see page 11 of the <i>Embracing the New Normal</i> guide.	Screening tool			
Prepare for the possibility that an employee tests positive for COVID-19 and may have been in the workplace. Inform your employees of the procedures to be followed.	WorkSafeNB FAQ			
Receiving payment for good and services				
<ul> <li>Use electronic payment devices (if possible). We encourage you to use the tap option or clean devices after each use.</li> </ul>				
<ul> <li>If you must handle money, ensure regular handwashing and have minimum 60% alcohol-based hand sanitizer readily available.</li> </ul>				
Cleaning and Disinfection	Cleaning and Disinfection for COVID-19			
Ensure availability of all necessary supplies for cleaning and disinfecting.				
Washrooms				
<ul> <li>Equip with hot and cold running water under pressure, liquid soap, paper towel, toilet paper and garbage containers where possible.</li> </ul>				
Hand-washing posters must be posted.	Handwashing Poster			
If multiple stalls and sinks are provided in washrooms, consider whether you need to limit access through maximum numbers allowed in the space at one time.				
Additional Considerations:				
Use <u>non-medical face coverings</u> for employees, clients and visitors to minimize the risk of transmitting COVID-19.  Develop procedures for selection, use, decontamination (if applicable), storage, handling,	Health Canada information on non-medical masks			
limitations, inspection requirements, change-out requirements and employee training, if coverings are used.	and face coverings			
Consider implementing a self-isolation unit. Isolate persons showing signs of COVID-19 immediately at the workplace. Keep the person isolated until they are picked up to avoid contaminating others.				
Provide mental health support to all workers, including access to an employee assistance program (EAP) or information on public health supports, if available.	GNB Mental Health Resource			

Action Items	Resources (Examples, Templates, Guidance Documents)	Details of Implementation (PPE Specifics, Frequency, Policy Name, Process, etc.)	How is it communicated? (Poster, Training, Verbal Notice)	Status (Done, In Progress, Not Started, N/A)
Public Health Requirements (applies to EVERY workplace)				
If your workplace CANNOT ensure minimal interaction of people within two metres of each	other – the requirements	listed below must be	e implemented	
Where feasible, install physical barriers (clear plastic guard, cubicle walls of appropriate design, curtains).				
If physical barriers are not possible:				
Implement active screening processes.				
Implement enhanced handwashing and sanitation/cleaning practices in shared areas and for shared items.	Cleaning and Disinfection for COVID-19			
Provide personal protective equipment such as:				
Hand protection (nitrile, rubber or latex gloves)	OHS Guide-PPE			
Eye protection (safety glasses, goggles or face shield)				
Other PPE as determined necessary through the risk assessment				
In areas/rooms where minimal interaction of people within two metres of each other is not possible, maintain a visitor and employee log. This must be made available to Public Health for contact tracing purposes if it's identified that a person who tested positive for COVID-19 was present in that area.				
Additional Protection				
Use <u>non-medical face coverings</u> for employees, clients and visitors to minimize the risk of transmitting COVID-19.  Develop procedure for selection, use, decontamination (if applicable), storage, handling, limitations, inspection requirements, change-out requirements and employee training, if face coverings are used.	Health Canada information on non-medical masks and face coverings			

Communicate to employees and supervisors their responsibilities under the OHS Act and regulations.  Communicate to all employees their three rights under the OHS Act.  Communicate to all employees their three rights under the OHS Act.  Communicate to all employees their three rights under the OHS Act.  Communicate to all employees their three rights under the OHS Act.  Communicate to all employees their three rights under the OHS Act.
